工程造價：四千六百萬元
完成日期：1997年尾至1998年尾

Previously village houses are developed individually, scatheredly and uncoordinatedly. Under the supervision of the zeppelin group, village houses developments are group together in a well organized master layout plan to form comprehensive developments with substantial scale in the New Territories. The Architect forgoes traditional village house design style and bring in rich architectural elements which are incorporated in the planning and design of the project. Within the limitations allowed by building regulations related to village house design, new types of articulated village houses are evolving thereby.

從前丁屋發展只局限於個別，分散及沒有協調的獨立建築，但在卓凌的統籌下，將這項目改為有整體性的丁屋綜合發展項目，含完備的總體規劃，包括道路，綠化及公共設施等。

在設計每間屋的造形方面，建築師放棄傳統而枯燥的丁屋設計，在合符政府丁屋規範的要求下，引進新穎的建築元素及概念，從而創出嶄新的丁屋設計造形。
