

Beijing Conway Building 北京建威大廈

Beijing PRC

業主：北京市建築設計研究院及香港廣俊有限公司
服務內容：整體規劃及建築設計
工地面積：7,900 平方米
總建築面積：62,000 平方米
工程造價：二億五千萬
完成日期：1997 年 5 月

The Building is conveniently located at the commercial area of Xidan, adjacent to West Second Ring Road of Beijing. The 3/F to 18/F of the tower provides office units whereas the ground floor and 2/F are designed for commercial uses.

The Building's exterior features classical granite claddings and glossy reflected glass windows/curtain wall. With efforts contributed by the project Manager and the Architect, the Project represents a successful joint venture between China and Hong Kong partners.

此大廈位於北京西城區復興門外大街與南禮士路交界，東臨二環路，位置優越。

大廈樓高十八層，首層為商業及商務中心，三至十八層為寫字樓。

大廈外牆鋪砌優質花崗石，配以反光玻璃及金屬鋁框，構成凹凸牆面，自然穩重及真璞超凡，實為一成功中外合作項目的好例子。
